Subject: HPV submission for CAS#19248136 and 63133744

Dear Administrator,

On behalf of Eastman Chemical Company, I am pleased to submit the test plans and robust summaries for N-ethyl-N-(3-methylphenyl)-1,2-ethanediamine (CAS No.: 19248-13-6) and Ethyl(3-methylphenyl)-amino acetonitrile (CAS No.: 63133-74-4) as part of my Company's commitment to the US EPA HPV program. These two chemicals are industrial intermediates that are manufactured and handled in such a way that they qualify as candidates for reduced testing. The justification for the basis of this claim is found within the document entitled "Reduced Testing Appendix". This appendix document should be attached to both test plans as it covers the manufacturing process of both chemicals whose synthesis occurs in a sequential manner. Please note that this submission is not a category despite some similarity between the two chemicals and the use of the appendix that applies to both chemicals.

The attached information has also been sent by regular mail too.
